## Cooper Crouse-Hinds Ex-Lite

Compact and lightweight LED Emergency Exit signs that provide a reliable and long life to exit marking

**LED Technology is an integral part of our Company-wide plan to broaden customer solutions and drive Innovation throughout all of our markets.**

The Ex-Lite series of hazardous location exit sign luminaires are ideally suited for marking escape routes and exits in potentially explosive atmospheres for use in indoor and outdoor applications.

The housing of the luminaire is constructed with a robust, light-weight aluminum alloy material and illumination of the sign is provided with red, high-efficient LEDs. Using LED technology provides the user with years of maintenance free operation throughout the > 50K hour service life of the exit sign. **These benefits reduce the cost of ownership and increase the level of safety in difficult to service locations.**
